Ham Radio Satellite Demonstration - July 7, 6pm

"LARC in the LIBRARY"

Using the working model cubesat recently displayed at the Livonia Civic Center Library, The Livonia Amateur Radio Club (LARC) will demonstrate how a microsat receives and transmits voice and data signals between licensed Amateur Radio operators, and how, with simple equipment, anyone can copy signals from many of these "ham sats" now in orbit. While this program is geared to the Amateur Radio community, anyone interested in space, electronics or communications is welcome. Registration is required as seating capacity is limited. Use the QR Code or URL below to link to the Library's event registration page.

Wednesday, July 7, 2021

6:00pm - 7:30pm

Bennett Civic Center Library Auditorium, Five Mile at Farmington Rd.
